ECO Series

ECO Recycler Truck Series

ECO ... from the word ECOLOGY ... the ecologically oriented machine.

Most of the design features of the EVO Smart Truck Series are inherent in the ECO Recycler Truck Series. The main difference between the two are in the body and frame configurations which result directly from the jobs each machine is intended to do.

Both residential and/or commercial collection body configurations are available for either commingled collection or curb separation of up to 10 different materials.

ECO-35-R

35 Cubic Yards
32,900 lbs. GVW
High Compaction

ECO-SA33

Semi-automatic
33 Cubic Yards
32,900 lbs. GVW
High Compaction
